TIBCO Data Science — Proficient

The course covers the advanced functions of TIBCO Statistica software, part of the TIBCO Data Science solution. It includes hands-on labs and covers the wide variety of data science applications, including graphical and statistical analysis, industrial statistics, and Statistica Visual Basic. It explains credit scoring, forecasting, quality control applications, predictive analytics and the Statistica Automated Neural Network.

Learning Objectives

• Summarize data access and export
• Summarize data preparation
• Discuss graphical UI and analysis
• Explore basic, multivariate, and industrial statistics
• Discuss Statistica Visual Basic
• Explore predictive analytics and neural networks.

Course Prerequisites

• TIBCO Data Science — Foundation
