This course covers the fundamental deduplication features and capabilities of the TIBCO EBX Match and Merge add-on for the TIBCO EBX 6 series. It explores functions and key components such as matching and merging on-demand, on user input, and in workflows, among others.

Learning Objectives

- Data deduplication operations
- Use of deduplication and:
  - Bulk execution
  - User input
  - Workflows
  - Fields from multiple tables
  - Customization of the output
- Identifying opportunities for performance optimization

Course Audience

- Project managers
- Architects
- Developers
- Business users

Course Design

- Lecture: 50%
- Lab: 50%

Course Length

- 2 days

Delivery Options

Course Complexity

- eLearning
- ILT

Course Prerequisite

- Study of the TIBCO EBX — Proficient course
